

# ENVIRONMENTAL LEAD NEWSLETTER

March - April 2000

## UPDATES AND ANNOUNCEMENTS

Kentucky has been an EPA authorized state since August 1998, which means the state is responsible for carrying out the certification; accreditation and compliance efforts related to assessment and abatement activities in target housing and child occupied facilities.

In that regard the agency is responsible for updating regulations to continue to assure that competent and trained individuals are conducting proper lead hazard assessment and abatement in order to reduce the potential for lead exposure to children and other occupants in residential structures and child occupied facilities. Also, assure the reduction of conflict between federal and state rules, more effective program compliance, and better understanding by the regulated community.

**Be advised that we are beginning the process of changing 902 KAR 47:080, 090, and 100.** All certified individuals were provided with copies of these regulations. If you have comments or recommended changes please forward them to this agency at the address indicated below as soon as possible.

-Continued on page 2-

## Lead Hazard Company/Supervisor Issues

### When is certification required?

Certification by the Department for Public Health is required when lead-hazard abatement activities are conducted in target housing or child occupied facilities. Even offering to perform lead-hazard detection or abatement services without certification is a violation of the law (KRS 211.9063).

However, the owner of the property or the individual who prepared the job specifications may want to use certified individuals on public or industrial projects. Certification requirements would be the same. However the submission of an occupant protection or abatement plan, or permit fee would not be applicable.

### Can an abatement company remain certified without a certified supervisor or designer?

**The answer is no.** Since an occupant protection and abatement plan is required for abatement projects and the company must follow the regulatory standards and rules a company cannot remain certified without an employee of this discipline.

On loss of the appropriate certified disciplines as required by regulation to be involved in the abatement process the company immediately becomes uncertified. Bidding a project at this time would make the company in violation of Kentucky laws and regulations.

### What is the problem?

The problem is that companies are waiting until the last minute to find refresher courses. It is imperative that individual certification expiration dates be checked; because taking the appropriate accredited refresher courses should be at least sixty (60) days before the certification is to expire. The agency can require taking the initial course over again if certification has expired.

## INSIDE THIS ISSUE

- 1 Updates and Announcements
- 1 Lead Hazard Supervisor/Company Issues
- 2 Inspector/Risk Assessor Issues
- 3 - 6 Listing of Certified Individuals/companies
- 6 Third Party Examinations
- 7 Training Provider Issues
- 7 Listing of Accredited Training Providers

Editor:  
Terry M. Wescott, Health Program Administrator  
Environmental Lead Program  
Division of Public Health Protection and Safety  
Department for Public Health  
275 East Main Street  
Frankfort, Kentucky 40621 (502) 564-4537

## Updates and Announcements –continued- Loss of Certification

The following individuals or companies have been removed from the listing of certified individuals since they have not renewed their certification.

### Supervisors:

Shawn Brinley	42-009
Shawn Logsdon	42-010
Dennis Brinley	42-011

### Risk Assessors:

Walter Becker	41-041
George Munich	41-031
Chuck Callahan	41-039

### Inspectors:

Tim French	40-003
Tim Eaton	40-004

### Companies:

Eagle Environmental Mgmt	45-003
--------------------------	--------

### The following individuals or companies will expire in May and June 2000\*:

### Risk Assessors:

Timothy Edlin	41-034
Douglas Peters	41-037

### Supervisors

James Berg	42-013
Lester Hambrick	42-012

### Designers

John Holley	43-001
Scott Hardin	43-002

### Companies

Keen & Cross	45-008
--------------	--------

\*See specific dates on listing. Certification applications must reach this office 60 days prior to the end of a certification period stated on the individual certificate.

## OTHER COMPANY REQUIREMENTS

In order for companies to maintain certification, companies must keep the Department updated in a timely manner if there are any changes with certified employees status, address/telephone changes etc.

## Company/Supervisor –continued-

### Permits

Some states require a project notification; however Kentucky requires an abatement permit. Abatement permits are required by law - KRS 211.9063 (5)(6).

Often a company will apply for a permit a few days before they wish to begin a job. Note, that the agency has seven (7) days to respond to the permit; therefore do not wait until the last minute to apply. **If deficiencies are found additional time may be required to in order to issue the permit.**

### Inspector/Risk Assessor Issues

### Report Review and Evaluation

At present there are 13 inspectors and 39 risk assessors certified by the Department. Some are beginning to re-certify as required at the end of the two (2) year certification period. **An application for re-certification shall be made sixty (60) days prior to the end of a certification period. Re-certification shall be denied if an applicant has failed to apply in that period of time.**

We are curious as to why some of these individuals are becoming re-certified since we have not received any copies of inspections or assessment reports.

As identified in 902 KAR 4:100 the provision of reports are required within thirty (30) days of the completion of the activity.

As a part of our compliance program, this agency reviews and evaluates inspection, screening, and risk assessment reports for standards and procedures as identified in 902 KAR 47:100 Sections 3,4,5.

**NOTE:** Under new agency policy, in order to become re-certified you will be asked to provide an affidavit indicating that you are aware of these requirements in reporting and must state you have not performed any of the above mentioned lead-hazard activities in the State of Kentucky.

## Certification Listing

### Lead-Hazard Risk Assessors

George D. Adams Exp. 10/1/01  
9305 Bova Court  
Louisville KY 40291-1486

Ted M. Audus Exp. 10/29/00  
Analytical Industries, Inc.  
Paducah, KY. 42003

Donald Morris

### **Third Party Examinations**

As a certification requirement identified in 902 KAR 47:080, most of the disciplines require taking a 3<sup>rd</sup> party examination. The 3<sup>rd</sup> party examination that is given is the EPA model.

Presently that examination is being offered at Kentucky TECH and college sites. There have been some problems associated with these locations due to changes in personnel, etc.

The agency is reviewing this process and may be changing the manner, locations and availability of the examination. Additional information will be provided at a later date.

## Accredited Training Courses

Mayhew Environmental Training (913) 842-6382 Lawrence, KS 66044 Belinda Pletcher, Training Manager <b>Worker/Inspector/Risk Assessor Expires 3/2001</b> <b>Supervisor</b>	

### Training Provider Issues

#### Expiration of Accreditation

The expiration of accreditation of some training courses will occur this year. The requirements for re-accreditation are indicated in 902 KAR 47:090 Section 14. Be aware that there is a time frame for re-accreditation and this must be met in order to be applicable for the reduced fee amount of \$150 per course.

#### Use of Non-EPA Model Course Materials

Although a training provider does not have to use the same format found in the EPA model curriculums, the materials used in the course must teach the same standards and procedures as required by State and Federal regulations and rules. The course must discuss EPA rules, HUD guidelines, State and any other applicable lead rules. If applicable, copies of regulations and rules should be provided to the students. The course materials must use the same terminology, definitions and testing standards used by EPA and HUD. Course content and handouts require continued updating.

Each training provider should be somewhat familiar with EPA course curriculum, **since as a part of the accreditation each principal instructor must have completed at least sixteen (16) hours of an EPA-model or departmental accredited lead-specific training course.** Although, which course is taken is not indicated, it is highly suggested the course taken is the course taught.

The Worker Course is now available and the Supervisor is scheduled to be available this Spring. EPA course materials\* can be obtained from the National Technical Information Services at 5285 Port Royal Road, Springfield, Virginia 22161, phone number (703) 605-6000.

\*Some course materials are presently being updated
